

Mohammad Tanim

Full-Stack Engineer

mohammad.tanim24h@gmail.com | +880 1916602197
github.com/mohammdtanim24h | linkedin.com/in/mohammad-tanim

Skills

Languages: JavaScript, Python, TypeScript, SQL

Technologies & Tools: React, Angular, Next.js, Node.js, Express, Django, FastAPI, Docker, MongoDB, Mongoose, MySQL, Bootstrap, Tailwind CSS, Git, GitHub, GitLab, Azure DevOps, Jira, AWS Lambda, Ollama, LangChain, Postman

Work Experience

Software Developer - ShujaBITS Infotech Solutions Private Limited

06/2022 - Present

- Designed, developed, and deployed full-stack web applications using React, Angular, Node.js, Express, Django, and FastAPI, serving clients in logistics, AI, and enterprise sectors.
- Built an **Inventory Management System** for logistics companies to manage inventory, automate stock tracking, and streamline warehouse operations, reducing manual data entry by 60%.
- Developed an **AI Interviewer Chatbot** using React, LangChain, and Ollama, integrating LLMs to simulate real-time interview experiences.
- Engineered an **Asset Management Application** for managing organizational as well as personal assets with real-time tracking, data visualization, and efficient asset categorization.
- Enhanced API performance and database efficiency through indexing, schema optimization, and query tuning, leading to up to 80% faster response times.
- Implemented Docker-based CI/CD pipelines, reducing deployment time and build errors by over 40%.
- React, Angular, Node.js, Express, Django, FastAPI, MongoDB, Mongoose, MySQL, Docker, Tailwind CSS, Bootstrap, LangChain, Ollama

Education

National University

Bachelor of Business Administration - BBA, Accounting

2022 - 2026

Awards and Certificates

- **Black Belt Award - Complete Web Development Course** (Programming Hero)
Recognized for outstanding performance and project excellence in full-stack web development.
- **Employee of the Month** - ShujaBITS Infotech Solutions Private Limited.
Awarded for consistent performance, teamwork, and contributions to client projects.
- **DevOps Workshop** (Ostad)
Completed hands-on training covering CI/CD fundamentals, Docker, and deployment workflows.
